To Whom It May Concern,

This letter is in appreciation to JMC Electrical Contractor, LLC on the Neiman's Family Market project in Clarkston, Michigan. JMC Electrical Contractor, LLC was a valuable team member providing the electrical resources as the prime electrical contractor on this new construction project.

The JMC Electrical team provided safe and sufficient manpower and materials during the construction process as well as when changes and additions were required on a tight grand opening schedule. Their field personnel provided excellent day to day communication with our staff and provided their high-quality services in a professional manner.

The success of any project depends in large measure on the teams assembled and their ability to work collaboratively with the other tradesman and work toward a mutual goal. JMC Electrical Contractor, LLC's service to Wolverine Building Group as well as Neiman's Family Market was excellent and their contribution to this project commendable. I highly recommend JMC Electrical Contractor and would welcome the opportunity in working with them on future construction projects that I am involved with.

Sincerely,

WOLVERINE BUILDING GROUP

Jim Meyers  
Project Manager
